

Vanguard Total Stock Market ETF | VTI

As of June 30, 2026

Investment approach

- Seeks to track the performance of the CRSP US Total Market Index.
- Large-, mid-, and small-cap equity diversified across growth and value styles.
- Employs a passively managed, index-sampling strategy.
- The fund remains fully invested.
- Low expenses minimize net tracking error.

Vanguard recently announced upcoming changes to the names of multiple Vanguard U.S. equity index funds. Following Morningstar’s recent acquisition of CRSP, the benchmarks tracked by these index funds will be rebranded from CRSP to Morningstar. In addition, Vanguard is adding “Morningstar” to the names of the funds tracking the Morningstar Indexes. For example, Vanguard Total Stock Market Index Fund will become Vanguard Morningstar Total Stock Market Index Fund. The name changes for both the Vanguard funds and the benchmarks are expected to occur in July 2026. A full list of funds changing names can be found on Vanguard’s website.

About the benchmark

- The CRSP US Total Market Index represents approximately 100% of investable companies in the U.S. equity market.
- The index is designed to accurately represent the U.S. equity market and deliver low turnover.

Performance history

Total returns ² for period ended June 30, 2026

	Quarter	Year to date	1 year	3 years	5 years	10 years	Since inception
VTI (Inception 2001-05-24)							
Net asset value (NAV) return ³	15.66%	11.07%	23.16%	20.43%	12.24%	15.04%	9.48%
Market price return ⁴	15.68	11.04	23.18	20.42	12.23	15.03	9.48
Spliced Total Stock Market Index	15.65	11.06	23.16	20.42	12.25	15.04	9.50

Dow Jones U.S. Total Stock Market Index (formerly known as the Dow Jones Wilshire 5000 Index) through April 22, 2005; MSCI US Broad Market Index through June 2, 2013; and CRSP US Total Market Index thereafter.

The performance data shown represent past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, so investors’ shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit our website at vanguard.com/performance. The performance of an index is not an exact representation of any particular investment, as you cannot invest directly in an index.

IIV (intra-day ticker)	VTI.IV
Index ticker (Bloomberg)	CRSPTMT
Exchange	NYSE Arca

ETF attributes

	Total Stock Market ETF	CRSP US Total Market Index
Number of stocks	3,531	3,482
Median market cap	\$336.5B	\$336.5B
Price/earnings ratio	27.0x	26.9x
Price/book ratio	4.9x	4.9x
Return on equity	24.7%	24.6%
Earnings growth rate	21.9%	21.9%
Turnover rate ⁵	2.6	—
Standard deviation ⁶	13.45%	13.45%

1. As reported in the most recent prospectus. A fund’s current expense ratio may be lower or higher than the figure reported in the prospectus.

2. Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Fund performance figures assume the reinvestment of dividends and capital gains distributions; the figures are pre-tax and net of expenses. The above widely used comparative index represents unmanaged or average returns on various financial assets that can be compared with the fund’s total returns for the purpose of measuring relative performance.

3. As of 4 p.m., Eastern time, when the regular trading session of the New York Stock Exchange typically closes.

4. Effective July 15, 2024, the market price returns are calculated using the official closing price as reported by the ETF’s primary exchange. Prior to July 15, 2024, the market price returns were calculated using the midpoint between the bid and ask prices as of the closing time of the New York Stock Exchange (typically 4 p.m., Eastern time). The returns shown do not represent the returns you would receive if you traded shares at other times.

5. For most recent fiscal year. Turnover rate excludes the value of portfolio securities received or delivered as a result of in-kind purchases or redemptions of the fund’s capital shares, including Vanguard ETF Creation Units.

6. A measure of the volatility of a fund—based on the fund’s last three years of monthly returns—used to indicate the dispersion of past returns. A higher standard deviation means a greater potential for volatility. For funds with less than 36 months of performance history, standard deviation is not calculated.

Basic Materials	1.6
Other	0.0

1. Represents the expense ratio for the Vanguard ETF as reported in the most recent prospectus. There are material differences between mutual funds and ETFs. Unlike mutual funds, ETFs are priced continuously and bought and sold throughout the day in the secondary market (at a premium or discount to net asset value) with the assistance of a stockbroker, which entails paying commissions. Sources: Lipper, a Thomson Reuters Company, and Vanguard, December 31, 2025.

2. The holdings listed exclude any temporary cash investments and equity index products.

3. Sector categories are based on the Industry Classification Benchmark system ("ICB"), except for the "Other" category (if applicable), which includes securities that have not been provided an ICB classification as of the effective reporting period.

Vanguard ETF Shares are not redeemable with the issuing Fund other than in very large aggregations worth millions of dollars. Instead, investors must buy and sell Vanguard ETF Shares in the secondary market and hold those shares in a brokerage account. In doing so, the investor may incur brokerage commissions and may pay more than net asset value when buying and receive less than net asset value when selling.

All ETF products are subject to risk, which may result in the loss of principal. Prices of mid- and small-cap ETF products often fluctuate more than those of large-cap ETF products.
